

Explorer for ArcGIS App (iOS):

1. If not already installed, search for the app in the App Store. While in the App Store, search for the app using “esri explorer” as your search terms.
2. After the app is installed, open it. Click on “Continue Without Signing In” at bottom of screen.
3. Search for “Pondera” and select the “Pondera County, MT PUBLIC MAP” map.
4. Once the map is opened, you can use the app. Featured functionality:
 - a. Change the Basemap (the default is a topo map, but you can choose Imagery, Night View, etc.).
 - b. Zoom to particular cities using Bookmarks (e.g. Conrad, Valier, Brady, Dupuyer, Ledger).
 - c. Perform address or road search. Advise that “less is more” – type the address number and first several characters of the road name if you are unsure of spelling; there may be pre-directionals (e.g. N, S, E, W, NW, SW, NE, SE), so you may have to try several times.
 - d. Get driving directions (e.g. with the App of your choice) by tapping the address.

Opens in separate navigation app.
