

Pondera County DES Public Map Available On-line

Frustrated with trying to use Google Maps or Apple Maps on your phone or on-line to find your address or someplace local? Finding those apps won't accurately locate your address or give accurate directions within the County?

Pondera County is pleased to announce the release of an on-line map – of the E-911 mapping and addressing data - for use by the general public. This digital map, powered by Environmental Systems Research Inc. (ESRI) software, uses data created during the implementation of the County's E-911 System and is now maintained by the County's Disaster Emergency Services (DES) office with ongoing support from the County's E-911 & GPS/GIS consultant, Mapping and Planning Specialists, Inc. (MaPS, Inc.). The digital map includes all of the County's addressed structures, its road network and other related information.

The map can be accessed in a variety of formats:

- Web Browser: Access the map using a web browser (e.g., Firefox, Chrome) by visiting "arcgis.com/home" and searching for "Pondera County, MT PUBLIC MAP" or use **the link found at the County website's DES page**.
- Explorer for ArcGIS App: Access the map using a mobile app on your phone or tablet (that you download through an app store). Android and iOS platforms are supported. Currently, the Android version has limited functionality compared to the iOS version; namely, iOS offers the ability to get driving directions while the Android version does not. The apps are constantly being updated by ESRI, so the Android version may eventually offer the same functionality as iOS.

For more information about how to access the public map and detailed app instructions, visit <https://www.ponderacountymontana.org/disasterandemergency>
